EXPERIENCE

AGILE MOBILE SOFTWARE ENGINEER | TribalScale
January – May 2016 | Toronto, Ontario
- Developed the internal iOS and Android app Event Central from start to its initial release.
- Created TribalScale's static web page using JQuery. AJAX, SASS. Bootstrap and JavaScript.
- Redesigned the ABC News iOS mobile app in Objective-C.
- Added features to VarageSale's internal web app using Ruby on Rails.
- Gained valuable work experience in leading projects, negotiating with clients, working closely with design team, and pair program.

FRONT END DEVELOPER | PointClickCare
January – May 2015 | Mississauga, Ontario
- Built an UI error logger which reports all user interface errors in the main application to a separate server.
- Utilizing HTML, CSS, JavaScript and JQuery to develop and maintain main web application.
- Troubleshoot UI consistency and uniformity throughout our application
- Debug cross-browser inconsistencies.
- Participate in team meetings and provide UI oversight when required.

IT SOLUTIONS DEVELOPER | TD Bank Group
January – May 2014 | Mississauga, Ontario
- Developed, maintained, and updated COBOL programs for TD's ATMS.
- Implemented programs that support cheque imaging for TD ATMs.
- Reviewed and integrated all application requirements including functional, security, integration, performance, and operation.

WEB DEVELOPER | Sun Wellness Center
August 2014 | Markham, Ontario
- Designed and maintained company's website in order to create a space to market the company's information and services.
- Used HTML, CSS, and JavaScript in the development of the website.

AWARDS

Botler | First Place
TribalScale Office Hackathon
My Fridge | First Place
Amazon Alexa Hackathon Hosted by Connected Labs
NoNoWhere | Best Domain Name
McHacks Hackathon Hosted by McMasters

PROJECTS

Botler | iOS
A mobile app designed for iPad to be used as a receptionist. It allows visitors to use voice recognition to interact with the app to find the employee they are meeting and send them a slack message.

My Fridge | Amazon Alexa Skill
A voice app that manages fridge inventory, handles expiry dates, and provides recipes based on available and soon-to-expire food using the Spoonacular API. Also an iOS companion app is built to handle front-end.

Event Central | iOS and Android
A networking app that allows users to RSVP events and get real time updates. It uses beacons, REST API, Google and LinkedIn SDK.

Tribal Bot | Slack Bot
A slack bot that allows a team member to send anonymous message to anyone on the team.

YOUR TRACKER CALENDAR | Android
Customizable calendar app that compares inputted annual and monthly data using graphics for observation and comparison. *Amazon and Google Play Store*

SNAKE | Android
A classic snake game written in Java.

NEIL'S HOME | Neilsun.me
Personal website created using HTML, SCSS, JavaScript and JQuery to host and display my portfolio.
